

## 에어칼리브 On Grid 수평형 풍력발전기

no.	상품명	이미지	10KW	20KW	30KW
1	Wind trubine		10KW horizontal axis electric controlled wind turbine with yaw controll, 380V. Three phase permanent magnet ac synchronous generator, flanged blades of 3.5m.	20KW horizontal axis electric controlled wind turbine with yaw controll, 380V. Three phase permanent magnet ac synchronous generator, flanged blades of 4.5m.	30KW horizontal axis electric controlled wind turbine with yaw controll, 380V. Three phase permanent magnet ac synchronous generator, flanged blades of 5.8m.
2	Wind controller		High quality 10KW On Gride wind controller with dump load box, with PWM constant voltage system and three-phase unloading system and yaw control system.	High quality 20KW On Gride wind controller with dump load box, with PWM constant voltage system and three-phase unloading system and yaw control system.	High quality 30KW On Gride wind controller with dump load box, with PWM constant voltage system and three-phase unloading system and yaw control system.
3	On Grid inverter		High quality 10KW On Grid inverter, output three phase 380V.	High quality 20KW On Grid inverter, output three phase 380V.	High quality 30KW On Grid inverter, output three phase 380V.
